

Filtrexx® SiltSoxx™ = Patented Compost BMP

Filtrexx® SiltSoxx™ are available in a variety of diameters and lengths to meet your project needs. Whether you need a system for storm water filtration or sediment control, runoff diversion and flood control, or green retaining walls, landscape applications, or even agricultural cropping systems, we have the optimum mesh containment system that harnesses nature to ensure your project is successful, sustainable, and profitable.

SiltSoxx™ for Sediment Control

- 50% more design capacity and flow through than silt fence
- NO trenching, NO soil disturbance
- Easy removal and little disposal costs
- 8x less maintenance than silt fence (USEPA)
- USDA Certified Biobased product, recycled, locally sourced, carbon neutral
- Can be installed by trained, certified professionals

InletSoxx™ for Inlet Protection

- Emergency overflow prevents flooding
- Easy to maintain, replace, and repair
- No need to remove storm grate to install
- Flocculants available for targeted pollutants
- Available on pallets
- Heavy duty Filtrexx® Soxx™ available for high traffic areas
- USDA Certified Biobased product, recycled, locally sourced, carbon neutral

DitchChexx™ for Check Dams

- Lower cost and maintenance compared to Rock Checks and Silt Fence
- Customizable diameters: 8, 12, 18, 24, 32 inches
- Can be vegetated for permanent applications
- Easy removal and disposal
- USDA Certified Biobased product, recycled, locally sourced, carbon neutral
